Dear Deer

Multiple Pliers

Dear deer dwells in the forest. With a soft and caring personality, it's loved by the other animals of the forest. Everybody is attracted to its unique characteristics. Its curving body stands out in two positions.

Standing straight up reveals its confidence and firmness. Sitting down conveys its laid back and graceful characteristics. The appearance of pliers imitates the shape of deer's horns. The body of the pliers uses different colors for the handles to distinguish two different purposes and function; there are long-nose pliers and diagonal cutting pliers to fulfill various needs.

Bear Papa

Ratcheting Screwdriver

Bear papa is a simple, honest, and kind bear. You can feel the spirit of dedication and honesty from his eyes. He is passionate about both taking care of family and helping others.

The body of the bear can be split to three parts: head, torso and feet. The ratchet screwdriver is settled with a magnetic bits holder of the head. Its torso can be removed from the feet which contain six different bits of most common sizes.

The white "V" on the chest of the black bear represents Taiwan Black Bear which is the most significant and rare animal of Taiwan. We'd love to share Taiwan Black Bear with the world with Bear papa.
